"A" number is Abstract page number; letter following is position of abstract on page.
"P" number is paper serial number in the Program.

SUBJECT INDEX

This index is composed of headings, subheadings and sub-subheadings, as illustrated by:

CARBOHYDRATES
METABOLISM
-CITRIC ACID CYCLE

Each of the subheadings and sub-subheadings occurred on the B Form. Many of the main headings were created, independent of the B Form, to analyze additional aspects of the papers presented.

The entries contained under each heading refer the reader to the page, and position on the page, of the author's abstract. The alphabetic information given with each reference tells the reader which category on the B Form the author chose as representing the main emphasis of his paper.
